- User experience
- User interface
- App design
- Web design
- HTML
- CSS
- TailwindCSS
- React
- MongoDB
- Express.js
- Node.js
- MySQL
- Excell

PROFILE

I'm an MCA student passionate about full-stack development and UI/UX design. I have strong skills in HTML and Tailwind CSS, and I'm actively building modern, responsive web projects. I recently completed a UI/UX bootcamp by Design Phoenix and received full-stack training from JM Tech Institute. I enjoy creating clean and user-friendly designs using Canva, Photoshop, and Figma. I'm always exploring new tools and ideas, and I'm active on LinkedIn where I regularly share my work.

Projects

Greeneden clone

Built a plant store website with a clean, responsive layout and attractive product sections using HTML and CSS. Showcases modern design principles with a focus on visual appeal.

- HTML
- CSS

Udemy clone

Designed an online course platform interface with structured sections for categories, featured courses, and reviews. Fully responsive and user-friendly.

- HTML
- CSS

Trip clone

Created a travel website layout featuring destinations, reviews, and booking options. Emphasized neat typography and grid-based design.

- HTML
- CSS

Meesho clone

Developed an e-commerce homepage using Tailwind CSS utility classes for quick styling. Includes product listings, banners, and a mobile-first approach.

- HTML
- Tailwind
- Javascript

EXPERTISE

Technical

- Figma
- Microsoft Power Point
- PhotoPea
- Adobe Photoshop
- Canva
- Microsoft word

INTERESTS

- Drawing
- Video Editing
- Chess
- Travelling

Actodo

Built a to-do list app with task add, edit, delete, and filter features. Used React hooks and local storage for smooth functionality and data persistence.

- React
- TailwindCSS

Army book store

Developed an online bookstore with a responsive design using Tailwind CSS and interactive features powered by JavaScript. Integrated NodeMailer for sending emails directly from the site. Focused on a clean UI and smooth user experience.

- HTML
- TailwindCSS
- Javascript
- Nodemailer

BulkMail

Built a bulk email sending platform using MongoDB, Express, React, and Node.js. Enabled users to send personalized emails to multiple recipients efficiently with real-time status updates.

- MERN stack
- TailwindCSS

Blog portfolio

Developed a personal blog portfolio using MongoDB, Express, React, and Node.js, allowing easy blog creation, editing, and showcasing of projects in an interactive interface.

- MERN stack
- TailwindCSS

Poverty poster

Created an impactful poverty awareness poster using Canva to convey a strong social message through visuals.

- Canva

User Persona

Designed a user persona in Figma to address the challenge of comparing multiple online platforms within a single app.

- Figma

Musical Carts

Created a Musical Carts website design in Figma, focusing on an engaging and user-friendly music shopping experience.

- Figma

TechForze

Created an advertising poster for the Tech Forze website using Photoshop, featuring bold typography, sleek layouts, and engaging graphics to attract audience attention.

- Photoshop
